Operating overview

Reporting period: January-June 2026

The company

Alpine Solar operates rooftop solar installations in western Switzerland.

The portfolio has three sites: Lausanne, Sion and Neuchatel.

All three sites remained operational throughout the reporting period.

Maintenance

The Lausanne site is scheduled for maintenance on 18 November 2026.

The planned outage is four hours, from 08:00 to 12:00 local time.

Sion and Neuchatel have no scheduled outage in November.

Reporting scope

The reporting perimeter covers all three operating sites.

Revenue reflects electricity sales during the reporting period.

Operating costs include maintenance, site leases and insurance.

Quarterly operating results

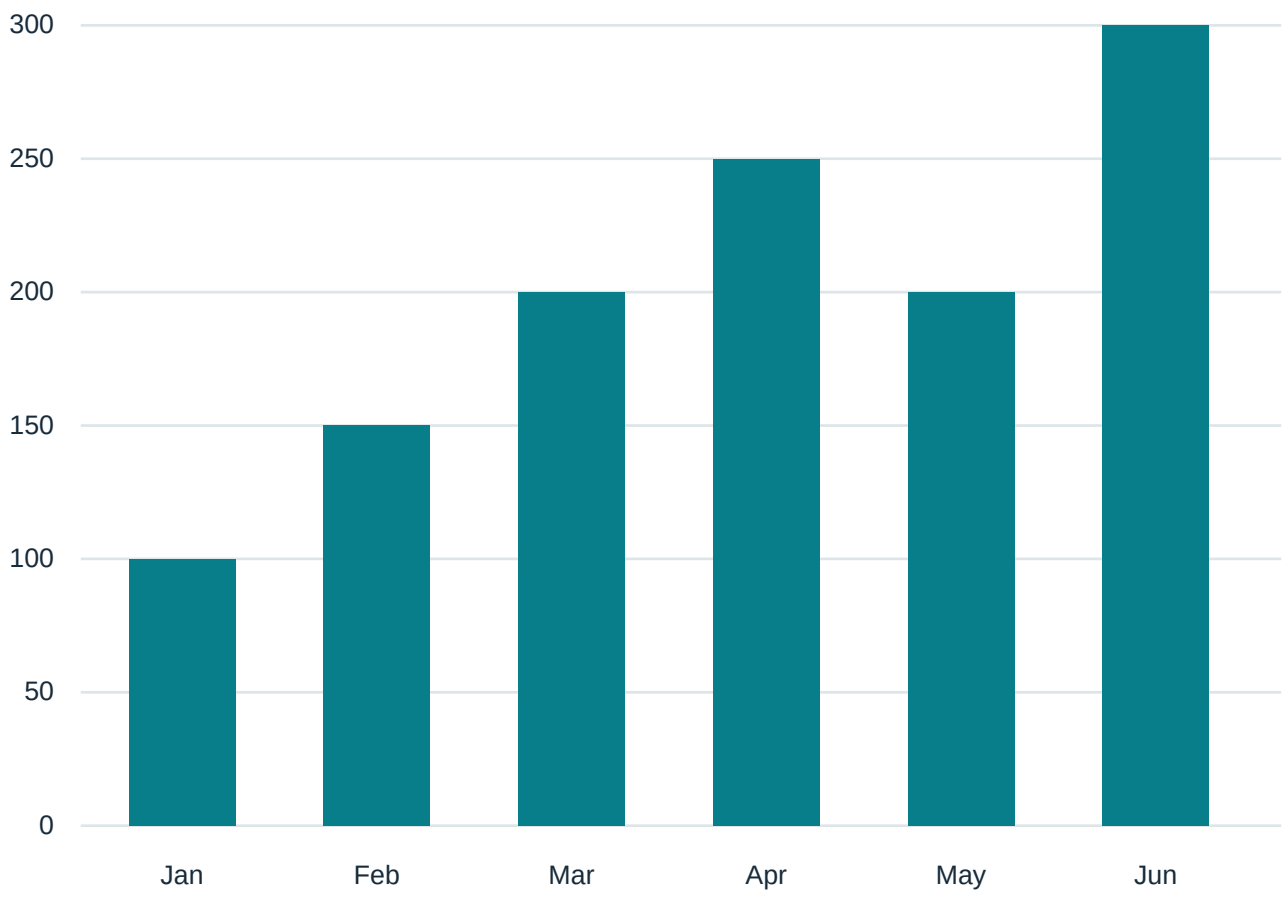

CHF thousands / Revenue and operating costs by site

Site	Q1 2026		Q2 2026	
	Revenue	Costs	Revenue	Costs
Lausanne	120	80	150	90
Sion	95	60	140	70
Neuchatel	80	55	100	65
Total	**295**	**195**	**390**	**225**
